**Subject:** Questions re: file number RZ000042, By law 2994

To whom it may concern:

Has Courtney City planners given any thought *with this project in mind* to the progressively worsening traffic clusters in one of 2 major flows out of Comox, especially with the two that are around the immediate vicinity? With a brand new multi level apartment building being built right now less than a block away, it's going to lead to many traffic problems without needing to put lights and crosswalks it every half block in the long run, without leading to deaths & injury.

Has Courtenay city planning given this consideration at all?
